

Some of the suggestions we have heard already

The case studies you have just explored offer different options for I-81, but they are not the only ones

Reroute traffic onto I-481 and use the viaduct as an urban park

Build a tunnel and put I-81 underground

Repair the viaduct

Replace the viaduct to modern standards and make it more attractive

Replace the viaduct with an urban boulevard and reroute traffic to I-481

Upgrade the transit system
